

HPE Enterprise Security ArcSight IPv6 Mapping Support – February 15, 2017

This support is for parsing and mapping of IPv6 fields, not for overall connector support in an IPv6 environment. See the documentation for individual destination devices to determine whether IPv6 addresses are supported for those devices.

Supported Platforms

Pure IPv6 and Dual Stack Support

CentOS Linux 6.8, 7.2, and 7.3 64-bit

Microsoft Windows Server 2012 Standard and 2012 SP1 64-bit

Red Hat Enterprise Linux (RHEL) 6.8, 7.2, and 7.3 64-bit

Dual Stack Support Only

Oracle Solaris 11 SPARC 64-bit

Oracle Solaris 11 64-bit

Supported SmartConnectors

IPv6 mapping is supported for SmartConnectors for the following devices:

- Apache HTTP Access File
- Apache HTTP Server Syslog
- Apache Tomcat File
- ArcSight CEF Encrypted Syslog (UDP)
- ArcSight CEF Folder Follower Scanner
- ArcSight Common Event Format REST
- ArcSight Common Event Format Syslog
- Blue Coat Proxy SG Multiple Server File
- Blue Coat Proxy SG Syslog
- Bro IDS NG File
- CA Single Sign-on
- Check Point OPSEC NG
- Cisco ASA Syslog
- Cisco IOS Syslog
- Cisco NX-OS Syslog
- Cisco Secure IPS SDEE
- Citrix NetScaler Syslog
- Dell ChangeAuditor DB
